

AMERICAN SAMOA

2020

STATISTICAL YEARBOOK

**DEPARTMENT OF COMMERCE
STATISTICS & ANALYSIS
DIVISION**

Message from the Director

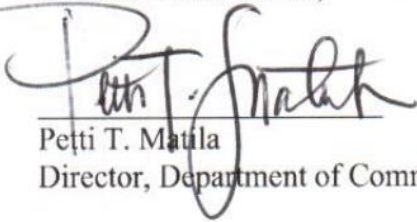

It is with great pleasure that I present the 2020 Statistical Yearbook for the territory of American Samoa, prepared by the Department of Commerce – Statistics Division. The combined yearbook is the thirty-eighth edition of this publication, which provided statistics and trends of demographic, social and economic characteristics of the territory from censuses, surveys and administrative records. I hope these data series on population, health, education, law enforcement, climate, land use, migration, trade, government finances, prices, employment, agriculture, utilities, and national accounts, promotes and perpetuates interest in the pursuit of happiness and wellbeing of the people of American Samoa. The Statistical Yearbook has long been a popular publication among local policymakers, business leaders, and civil organizations.

The collection and analysis of the raw data summarized in the Statistical Yearbook would not be possible without the cooperation of the many local and federal government agencies, private businesses and individuals. The Department of Commerce wishes to express our deepest appreciation to those who have contributed to this edition, and I look forward to any valuable input submitted for improving the quality and contents of the yearbook.

I hope that you will find this publication useful and informative for good governance, sound decision making and evidence-based planning.

A comment form is provided at the end of this book for your suggestions.

Fa'afetai ma ia Soifua,

A handwritten signature in black ink, appearing to read 'Petti T. Ma'ula', is written over a horizontal line. The signature is fluid and cursive.

Petti T. Ma'ula
Director, Department of Commerce

MAP OF THE PACIFIC ISLANDS

American Samoa

Capital: Pago Pago

Land Area

77 square miles
Total islands and islets: 7
Main island Tutuila, 58 square miles
Pago Pago Harbor, Tutuila

Economy

Currency: US dollar
Estimated per capita income 2020 Census: \$8,425
Income Sources: canned tuna and
Government services
Government employment 2020: 6,614 workers
Motor vehicles registered in 2020: 11,287
Number of telephones in 2020: 9,203
Gross Domestic Product (2020 GDP): \$709 million

Population

Population Estimate 2020: 57,637
Census 2020: 49,710
Annual growth rate: -10.5 percent
Median age 2020: 27.7 years

Distance from

Honolulu: 2,566 miles
Los Angeles: 4,800 miles
Auckland: 1,800 miles

UNITED STATES AND METRIC WEIGHTS AND MEASURES

U.S.	to	Metric	Metric	to	U.S.
LENGTH:					
Inches	X	25.4 =	millimeters	X	0.039 = inches
Feet	X	0.305 =	meters	X	3.281 = feet
Statute miles	X	1.609 =	kilometers	X	0.621 = miles

TABULAR PRESENTATION

Explanatory Notes: The following symbols used in the tables throughout this publication are explained in enclosed form in footnotes to the tables where they appear.

- Represents zero or rounds to less than half the unit of measurement shown
- .. Not available or not applicable
- (E) Estimates
- (P) Preliminary
- ® Revise
- (D) Data withheld to avoid disclosing data for individual’s farm

Fa’alavelave – Samoan cultural events

***Calendar Year is used unless otherwise specified**

Head-notes immediately below table titles provide information for correct interpretation or evaluation of the tables as a whole or for a major segment of it.

Unit indicators (“In thousands”, “In millions of dollars”, etc.) are usually given as the first element of the head-notes. In tables where several units are used, the unit indicators are generally given in the stub in the column headings.

Footnotes below the bottom rule of tables give information relating to specific items, figures or symbols within the tables. Details may not add up due to rounding.

All annual statistics should be understood as referring to calendar years unless otherwise indicated.

Government Fiscal Year starts from October of previous year to September of current year.

To Request Copy of the Yearbook

Copies of the yearbook are available in electronic format and hard copy. However, hard copies are limited and only available upon special request. You can download a copy in PDF on our DOC website: www.doc.as.gov or emailed to you by contacting the Statistics and Analysis Division at 633-5155 or email at americansamoastatistics@doc.as.gov.

LIST OF TABLES

Table No.	Table Title	Page No.
POPULATION		
1.1	Population, Density and Growth in the Pacific: 2020	2
1.2	Census Population, Growth, Gender and Median Age: 1900 to 2010	3
1.3	Census Population by District: 1900 to 2020	4
1.4	Mid-Year Population Estimates: 2010 to 2020	4
1.5	Migration and Natural Increase: 1970 to 2010	5
1.6	Birthplace by District and County, American Samoa: 2010	5
1.7	Population by Village: 1980 to 2020	6-7
1.8	Population by District and County: 1940 to 2020	8
1.9	Sex Ratio: 1908 to 2010	9
1.10	Percent Never Married and Age at First Marriage: 1956 to 2010	9
1.11	Average Number of Children Ever Born Per Woman: 1956 to 2020	10
1.12	Age by Place of Birth, American Samoa: 2010	10
1.13	Father's and Mother's Place of Birth by Place of Birth and District, American Samoa: 2010	11
1.14	Mother's Country of Birth: 1974 to 2010	12
1.15	Parents Place of Birth: 2010	12
1.16	Ethnic Origin and Race: 1980 to 2010	13
1.17	Citizenship by District: 1990, 2000 and 2010	14
1.18	Household by Type: 1980 to 2010	15
1.19	Place of Birth: 1980 to 2010	15
1.20	Village Population by Gender: 2010	16-17
1.21	Village Population by Age Group: 2010	18-19
1.22	Population by Age: 1970 to 2010	20-21
1.23	District and County Population by Age: 2010	21
1.24	Village Population by Ethnic Origin: 2010	22-23
1.25	Ethnicity: 1990 to 2010	24
VITAL AND HEALTH STATISTICS		
2.1	Vital Statistics: 2010 to 2020	26
2.2	Births by Month: 2010 to 2020	27
2.2a	Deaths by Month: 2010 to 2020	27
2.3	Live Births by Birth weight: 2010 to 2020	28
2.4	Live Births by Legitimacy and Gender: 2010 to 2020	28
2.5	Live Births by Age of Mother and Live Birth Order: 2020	29
2.6	Live Births by Age of Mother: 2010 to 2020	29
2.7	Live Births by Type: 2010 to 2020	30
2.8	Deaths by Age: 2010 to 2020	31
2.9	Deaths by Age and Gender: 2010 to 2020	32
2.10	Cause of Death: 2010 to 2020	33

STATISTICAL YEARBOOK 2020

2.11	Infant Deaths by Month: 2010 to 2020	34
2.12	Notifiable Diseases: 2010 to 2014 and 2017-2020	36
2.13	Out-patient Visits by Type of Clinic: 2010 to 2020	37
2.14	Hospital Discharges by Type of Service: 2010 to 2020	38

Section One

POPULATION

Recent census counts, current population estimates, population densities and annual population growths are provided for Pacific Island Countries by the three racial groups. Results of the American Samoa Federal Census of 2020 by village, county and district are presented here. More demographic details of the resident population from the 2010 Census are also provided in this section.

The last census count of American Samoa showed another drop in the number of residents from 55,519 in 2010 to 49,710 in 2020, despite much higher population estimates derived from historical natural growths (births minus deaths) and travel statistics (arrivals less departures). It is another decennial census loss of 5,809 persons. The mid-year population estimate is derived from the Balancing Equation method going back to 1990. Recent censuses conducted for American Samoa did not go through thorough scientific-demographic assessments for complete counts such as post-census enumeration; sampled re-enumeration of basic collection units; direct comparison of secondary sources by census collection geography; and other methods of census complete count quality assurances. The COVID_19 Pandemic and its global impacts affected census enumeration in 2020 for the whole United States. In the American Samoa enumeration, the house-to-house personal interviewing halted for about three months due to the lockdown and COVID restrictions.

Except for the 2020 geographic counts by village, county and districts, detailed characteristics from the 2010 census had been reproduced here due to the absence of 2020 updates. About 64% of the residents lived in the Western District while only 34% lived in the Eastern District and only about 840 people (1.7%) lived in Manu'a. Tualauta is the most populated county holding about 46% of the territorial population or 72% of the Western District population. Maoputasi is the next most populated county holding about 17% of the territorial population or 50% of the Eastern District population.

The Sex Ratio from the 2010 census is 103.0 and the median age is 22.4 years. About 42.4% of the residents were born outside American Samoa including a little over 3,400 United States born. The real foreign born is 20,132 or 36% of the resident population. About 56% of the resident population had both parents born outside of American Samoa while only 17% of residents had both parents born in the territory. About 89% are of Samoan ethnic origin with about 7% Asians including Chinese, Koreans, Japanese, Filipino; 3% Tongans and 1% White. About 65% of residents are US Citizens or Nationals; almost 20,000 were either permanent residents or temporary residents. Single mean age at first marriage is 27.3 years for male and 26.7 years for female.

There were 9,688 households in American Samoa in 2010: 91.2% were family householders, 58.1% of family householders had children under the age of 18 years. There were 1,630 female householders with no husband present, 38% of these female householders had own children under 18 years. A little over 76% of all households had children 18 years and younger and 19% of households had old aged populations of 65 years and over.

TABLE 1.1. POPULATION, DENSITY AND GROWTH IN THE PACIFIC: 2020

Section Two

VITAL AND HEALTH STATISTICS

This section presents data on births, deaths, life expectancy, marriages, diseases, patient visits and hospital discharges.

Births continued to decline while deaths continued to climb. The LBJ Tropical Medical Center reported 739 births and 322 deaths in 2020. Crude Birth Rates per 1,000 live births dropped from about ten years ago to 12.7, while the Crude Death Rate per 1,000 deaths moved upward to 5.6. Infant Mortality Rate of 6.2, Neonatal Mortality Rate of 18.6, and Fetal Death Rate of 21.7 per 1,000 live births all went up in 2020. Births have dropped from around 1,300 ten years ago to only 734 in 2020. Teen births (ages 19 years and below) made up about 9.5% of total births in 2020. Population natural growth is defined as total births minus deaths. The natural growth of the population in 2020 was 412. Only 412 people were added to the resident population in 2020 due to natural growth.

The leading cause of death in 2020 was Heart Disease, Malignant Neoplasm, Influenza/Pneumonia, Hypertension, and Cerebrovascular in that order. Notifiable Diseases have been updated since 2014; however, 2015 and 2016 data are still missing. Communicable diseases have dropped from about 5,100 in 2019 to 3,900 in 2020 despite the COVID-19 pandemic in 2020. There was also a big drop in Influenza/Flu cases reported in 2020.

The number of out-patient visits in 2020 was 120,716; another increase of about 4% from the previous year. The Vital Statistics Office reported 214 marriage licenses issued in 2020, an increase of 23% from 2019.

Table 2.1. VITAL STATISTICS: 2010 TO 2020

Year	Estimated population	Births	Deaths	Rates per 1,000 persons		Deaths under 1 year					
						Numbers			Rates per 1,000 live-births		
				Births	Deaths	Infant	Neonatal	Fetal	Infant Mortality	Neonatal Mortality	Fetal deaths
2020	57,637	734	322	12.7	5.6	8	6	7	10.9	8.2	9.5
2019	58,500	840	278	14.4	4.8	6	4	2	7.1	4.8	2.4
2018	59,600	921	298	15.5	5.0	10	6	14	10.9	6.5	15.2
2017	60,300	1,001	310	16.6	5.1	6	8	5	6.0	8.0	5.0
2016	60,200	1,013	280	16.8	4.7	14	9	7	13.8	8.9	6.9
2015	60,863	1,096	314	18.0	5.2	11	3	9	10.0	2.7	8.2
2014	61,811	1,084	259	17.5	4.2	9	8	13	8.3	7.4	12.0

Section Three

EDUCATION

This section presents statistical information on Public and Private educational institutions, enrollment, and educational achievement.

The Department of Education statistics has not been updated since 2018. Total enrollment slightly went up in 2018 but remained below the 17,000 mark. Elementary Schools made up about 52% of total enrollment, followed by High Schools with 26%, Pre-School with 10%, K-Programs with 6% and the ASCC with another 6%. Throughout the ten-year period the general decline of school enrollment is evidently a result of declining fertility. In 2010 enrollment was slightly above the 20,000 mark; a drop of 15% compared with current enrollment. This is a similar trend for all school systems including the Community College.

The ASCC enrolled 1,087 students in the Fall Semester of 2020; compared to ten years ago, college enrollment dropped by 50%. A total of 626 students were full-time students while 461 were part-time. Only 393 new students entered ASCC in 2020 and on average, only 36% of High School graduates enrolled at the college for the first time. The rest were either moving out to the mainland or seek employment after high schools. The 2020 graduation data is still being processed. However, about 39% of the 2019 ASCC graduates received Associates of Arts, 46% with Associate of Science, 5% with Certificates of Proficiency and 10% with Bachelors in Elementary Education.

The 2010 Census of American Samoa included questions on school enrollment of those 3 years and over and educational attainment of the resident population. There were a lot more people stated that they were enrolled in schools from the Census than reported in government administrative records. For example, the 2010 Census stated 21,196 persons 3 years and over enrolled in schools and only 20,078 enrollments reported with administrative data for 2010, a difference of 5.6%. Of the population 25 years and over, 82.1% were high school graduates, 9.9% with bachelor degrees or higher.

Section Four

LAW ENFORCEMENT

This section provides statistics on Law and Order, containing data on crime, traffic, accidents, firearm registration, correctional facility, population, fire, and court activities.

The Department of Public Safety reported 223 Part I offenses in FY2020. Part I Offenses include eight crime categories: murder and non-negligent homicide, rape (legacy & revised), robbery, aggravated assault, burglary, motor vehicle theft, larceny-theft, and arson. The most crimes committed during FY2020 were larceny, burglary, and assault (1st and 2nd). DPS also reported 1,814 Part II Offenses in FY2020, an increase of 10.4% from FY2019. Part II Offenses are other assaults, forgery and counterfeiting, fraud, embezzlement, stolen property (buying, receiving possessing), vandalism, weapons (carrying, possessing, etc.), drug abuse violations, gambling, offenses against the family and children, driving under the influence, liquor laws, drunkenness, disorderly conduct, vagrancy, suspicion, curfew, loitering laws (person under age 18), runaways (person under age 18) and all other offenses not specified. Of the Juvenile population, Part I Offenses reported in FY2020 amounted to 77 while Part II Offenses registered at 127. The two leading offenses by the Juvenile population for all crimes reported were Assault and Disorderly Conduct.

Traffic accidents went up in FY2020 by about 19%. There were 664 traffic accidents reported in FY2020 compared to 557 in FY2019. A total of 57 people suffered injuries in those accidents and resulting in 3 fatalities. A total of 115 firearms were registered in FY2020.

The average monthly inmate population in FY2020 was 240 compared to a monthly average of 210 in FY2019. There were 103 fires reported in FY2020: 94 Residential, 6 Commercial and 3 Industrial. The High Court reported 353 cases filed in FY2020. There were 957 cases pending from FY2019 and 297 cases were disposed of.

Section Five

CLIMATE

This section presents climate data for American Samoa. American Samoa has a tropical maritime climate with abundant rain and warm, humid days and nights. The average temperature in 2020 recorded at 82.2 degrees Fahrenheit; a slight drop from 82.4 degrees in 2019. Throughout the past ten years, average temperatures remained within the range of 81.2 to 82.5 degrees. The month of February recorded the most rainfall with 32.73 inches and the month of May recorded the driest with only 6.97 inches of rainfall. The two main seasons in Samoa are the wet and dry seasons; sometimes referred to as “summer” and “winter”. The south coast receives, on an annual basis, approximately twice as much rain as the north coast. Summer or wet season is also cyclone season and runs from November through April. Winds tend to be either calm or mainly out of the north. Although heavy rain, showers and long rainy periods can occur any month of the year, torrential downpours are most common, and humidity is at its peak during the summer months. Winter or dry season is also Trade Wind season and runs May through October. The Trade Winds are mainly south-easterly but can turn to a more easterly direction at times. During the winter months the Trade Winds tend to blow rather incessantly and can range from anywhere from mild to rather strong at times. However, the Trade Winds can also blow during any month of the year, not just the winter months, or they might unexpectedly stop blowing in the middle of the Trade Wind season, often for days at a time

Section Six

LAND USE/REGISTRATION, HOUSING CHARACTERISTICS, AND BUILDING PERMITS

This section presents statistics on land use, land ownership registration and tenure, housing characteristics, building permits, type, and value of construction activities. American Samoa has a total land area of 48,767 acres and about two-thirds of the land is steeply sloping and virtually inaccessible. Land Registration at the Office of the Territorial Registrar recorded an additional 43 acres registered in 2020 resulting in approximately 7,985 acres of registered land in American Samoa. The additional 43 acres included 1 acre of Church Land, 22 acres of Individually Owned land, and 20 acres of Communally Owned or Native land. Communal Land holds 27.1% of all registered land followed by Individually Owned Land with 25.9%, Government-Owned Land with 20.7%, Freehold Land with 13.4% and Church-Owned Land with 12.9%.

In the 2010 Census, American Samoa registered 10,963 housing units of which 88.4% were occupied and 11.6% were vacant units. A housing unit is a house, an apartment, a mobile home or trailer, a group of rooms or a single room occupied as separate living quarters or, if vacant, intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants live and eat separately from any other persons in the building, and which have direct access from outside the building or through a common hall. Of the 9,688 occupied units, 73.3% were owner-occupied and 26.7% were renter occupied. In the Tualauta County, Tafuna village had the highest number of occupants per room in both owner-occupied and renter-occupied units. Approximately 55% of the 10,963 housing units were in the Maoputasi and Tualauta counties. These two counties also hold 50% of the housing rental market.

Housing units are characterized as single detached units, attached units, 2 houses, 3 or more houses. About 12.5% of households in American Samoa live in two or more houses. Those living in apartment housing although small but are on the rise as 7% of households live in building with two or more housing units. Those living in single detached houses have increased slightly from 78% in 2000 to 79% in 2010. The number of building permits issued in 2020 recorded at 257; 150 for new construction and 107 for extension, repair, and alteration, all valued at \$12 million.

Section Seven

INTERNATIONAL ARRIVALS AND DEPARTURES

This section presents statistics on international arrivals and departures by purpose of travel and citizenship of travelers, tourism markets, and net travelers.

International travel plunged by -85% in FY2020. The COVID-19 pandemic caused an unprecedented disruption to international travel, with a massive fall of international tourism demand amid widespread lockdowns and travel restrictions put in place by countries in order to contain the spread of the virus. This resulted in huge economic and social impacts, placing direct travel related jobs at risk especially micro, small and medium sized enterprises.

Only 11,143 travelers arrived in American Samoa in FY 2020 and 9,335 left, resulting in a net arrival of 1,808 travelers. Resident arrivals accounted for 60% of travel followed by Crews with 22% and Employment with 10%. There were only 203 tourists arriving and 419 left reflecting again a similar trend in pre-COVID years.

Crew arrival is substantially higher than expected probably because of the slowdown in fishing and shipping activities. There were 2,428 arrivals versus 100 departures; a net crew arrival of 2,328. Over half of crew arrivals were from these three countries namely Indonesia, Philippines and Samoa.

Section Eight

ELECTION

This section presents data on elections in American Samoa including voter registration, election results. Election participation by Representative District is further broken down by village, age, and gender of the voting population. The 1994 General Election was the first election conducted with a new electronically processed Voter Registration System requiring a more scrutinized documents verification process of all registered and new voters. The automation processed took to the 1994 poll two separate voter registration rolls for the old and the new system. As a result, the Election Rolls dropped from over 15,000 voters in the 1992 election to a little over 11,000 registered voters in the 1994 election. Since then, the American Samoa Voter Registration system maintained all electronically processed documents including Federal Post Card Applications (FPCA) for overseas military and college residents

Voter Registration has dropped when comparing Gubernatorial Elections in 2016 and 2020. A total of 16,341 voters were registered for the 2020 Gubernatorial Election, and although increased from the 2018 Election, the official roll declined by 5% compared to the 2016 Gubernatorial Election. This pattern is seen in the past 20 years of territorial elections as much higher voter registration occurred in gubernatorial election years only. The 2020 election recorded the highest voter turnout of the past four elections – 73.7% exercised their right to vote. Manu’a II, Saole, Alataua and Swains voters all reported over 80% of voter turnout. The lowest turnout was Representative District No. 10 - Ma’oputasi with 67.8%.

Section Nine

GOVERNMENT FINANCE

This section presents statistical data on government finance, revenues and expenditures.

The American Samoa Government collected \$351.6 million in revenue and spent \$348.1 million in FY2020 resulting in current operations surplus of \$3.5 million. The overall government financial statements in the past 10 years reflected a positive cumulative year end fund balance of \$47 million at the end of FY2020. The favorable government financial stability was triggered by two major bond sales in 2015 and 2016 that brought in about \$79 million.

Federal funds received in FY2020 amounted to \$237.6 million (67.6%) while local revenues amounted to \$114.1 million (32.4%). A total of \$77.4 million of income and excise taxes were collected, another \$12.1 million was received from Charges for Services, \$8.1 million in fines and fees, \$5.1 million from Indirect Cost, and the rest from other local sources. Government spent 31.9% of funds on Health and Welfare; 23.3% on Education and Culture; 25.8% on General Government, and 5.1% on Economic Development.

Section Ten

LABOR FORCE, EMPLOYMENT AND EARNINGS

This section presents statistical data on labor force participation, employment, and earnings. In 2020, current employment was estimated at 16,399; a drop of about 2.3% from the 2019 estimate. Government employment accounted for about 40.3% of all employment and 59.7% Private Sector jobs including the Cannery. Government jobs continued to climb in the last 5 years.

The Fair Labor Standard Act - Minimum Wage Act of 2007 (Public Law 110-28), as amended, applies minimum wage rates to 18 Industry Classifications in American Samoa. This law also provides for additional increases in the minimum wage of \$0.40 per hour to occur every three (3) years (e.g., 2018, 2021, 2024, etc.) on September 30, until reaching the minimum wage generally applicable in the U.S. which is now at \$7.25 an hour.

In 2010, the median household income was \$23,892. Close to \$350 million worth of income from all sources were received by all residents of the territory in 2010. Thus, the per capita income was \$6,311. In 2010, about 57.8 percent of all persons or 54.4 percent of families were below the national poverty level. Of the 3,875 grandparents reported to have lived with their grandchildren, 66 percent of them were responsible for taking care of grandchildren.

Note: The Fair Minimum Wage Act of 2007 (Public Law 110-28) as amended, applies the minimum wage rates shown above to industries in American Samoa. This law also provides for additional increases in the minimum wage of \$0.40 per hour to occur every three (3) years (e.g. 2018, 2021, 2024, etc.) on September 30, until reaching the minimum wage generally applicable in the U.S.

The American Samoa Government raised the government's minimum wage from \$5.21 to the federal level of \$7.25 effective July 1st, 2021.

Section Eleven

CONSUMER PRICES AND EXPENDITURES

This section presents statistical data on local consumer prices and indices along with major household expenditures.

The American Samoa Consumer Price Index (CPI) is designed to measure changes in prices of commodities and services normally purchased by the community. The American Samoa CPI (like the U.S. CPI) is based on the concept of a representative "market basket"; a selection of goods and services normally purchased by local consumer units. The CPI was first developed during the early part of 1974. The selection of the market basket weights distribution was based on the "General Statement of Articles of Import of Merchandise into American Samoa from July 1970 - June 1971". The weight distributions were later updated using household expenditure patterns derived from a Household Income and Expenditure Survey (HIES) conducted by the Economic Development and Planning Office (EDPO) in 1982. The market basket weights distribution was later adjusted with results of the 2005 and recently, the 2015 HIES. The next HIES will be the sixth survey of household expenditure in American Samoa to be conducted in 2025.

The last CPI rebase was carried out at the end of 2016 and a total of approximately 210 selected items were divided into 9 major groups for measurement of price movements on a quarterly basis. The 2020 CPI at year-end was registered at 103.7 points: a slight drop from the 103.9 at year-end 2019. Inflation in the early part of 2020 remained at less than half a percent while deflations were recorded in the last three quarters of the year. The CPI Quarterly Newsletter provides more details on price changes, annual inflations and average cost of selected commodities.

The last HIES was conducted on April 1st, 2015. Detail household expenditure tables are provided by groups and subgroups. Total household spending in American Samoa in 2015 amounted to \$355 million. Food is the number one expenditure group with 26.1%, followed by the Housing group with 25.0% and Other Goods and Services group with 19.9%. This last group included expenses on Church and Cultural relations.

Section Twelve

COMMUNICATION AND TRANSPORTATION

This section presents statistical data on communication and transportation services including vehicle registration and driver licenses, vessel and cargo movements, and air traffic and aircraft operations.

The number of telephone landlines is approaching the 2010 level with 9,203 instruments and 552 miles of telephone cables. Cellular instruments had gone up by close to 30% in 2020 and phone cards is a thing of the past while e-charges top ups at 2.2 million. Internet subscribers also increased in 2020 by 30% while cable subscribers slight went down from 2,411 in 2019 to 2,137 in 2020.

Wealth accumulation and prosperity has never before seen before in terms of investments such as cars and housing. In 2020 the number of vehicle registration has increased by 14% with over 1,000 more privately owned vehicles compared to 2019. A total of 11,287 vehicles were registered in 2020 compared to 9,890 vehicles in 2019. About 85% of all registered vehicles are private vehicles. Buses, Rental Cars and Taxis registration all went up, likewise, government vehicles increased in one year.

Vessel movement was cut in half compared to five years ago while cargo (tons) doubled. Both waterfront and airport incoming cargo increased significant in the last two years. In 2020, over half of the incoming vessels were fishing boats and over half of total cargo landed (tonnage) was oil petroleum with 519,488 tons or 388.6 million gallons.

Air traffic operation has been at a standstill due to the pandemic and airport activities were reduced from 5,734 flights in FY2019 to only 1,744 flights in FY2020. Of the 1,744 flights recorded between the Pago International Airport and All Destinations, 11,974 deplaned (arrived) and 11,939 enplaned (left). When these numbers are matched against the arrival/departure statistics reported by the Immigration, the Department of Port Administration data are much higher. This should not be the case since the Immigration data includes Sea Port travel. Documenting travel data regardless of frontline agency needs major improvements.

Section Thirteen

AGRICULTURE AND FISHING

This section presents statistics on agricultural land, farms, farm tenures, field crops, livestock, and local fishing activities.

The administrative scope in the conduct of the Agricultural Census changed after 1990 where a supplemental agricultural form was attached to the regular Population and Housing Census since 1920. The first Agricultural Census conducted every five years by the USDA-NASS agency was in 1998. In 2013, USDA-NASS did not have enough funds to carry out the agricultural census and the recent census was conducted in 2018. This administrative change is reflected in the historical trend of agricultural activities where the number of farms and measurable quantities increased significantly.

The 2018 Agricultural Census showed that the number of farms went up but land in farms dropped. Only 14,404 acres of land were in farms but a total of 6,329 farms, suggesting that more people were returning to farming with much smaller farm lots. As such, the average size of a lot dropped from 3.3 acres to 2.3 acres compared to the Agriculture Census of 2008. Almost all farms were cropland farms. The average age of a farm operator was 54 years old and only 964 worked for pay or paid farm workers. The total worth of agricultural farms in the 2018 Agricultural Census was estimated at \$44 million. Farms with less than \$100 of sales (presumably the majority of subsistence farming) consumed almost \$25 million worth of agricultural produce. Only 235 big farms (with \$10,000 or more of sales) sold \$7.5 million worth of produce. Local agriculture is mainly for family consumption where 75% of all produce were for family consumption while only 25% is sold locally with hardly any indication of agricultural exports to foreign markets. Fruits and Nuts accounted for 46% of total value of agriculture followed by Field Crops with another 41%. Fish caught in the ocean, valued at \$2.6 million and was mostly sold to the public. Chicken and Chicken Eggs was mainly for family consumption with less than 10% going to commercial sales. The Manu'a District has 30.3% of total land area but only 1.8% of land is in agriculture; Eastern District has 32% of total land area and 30.4% is in agriculture while the Western District has 36.8% of total land area with 51.8% in agriculture.

There are no new data received from the Department of Agriculture for the past four years. Of local stable food sold at the market in 2016, over 120,000 pounds of green bananas were sold; 66,000 pounds of taro; 90,000 pounds of fruits 58,000 pounds of ripe banana and 12,000 pounds of vegetables. Fishing activities continued to decline as the number of local fishing boats and estimated catch dropped in FY2020. Longlining was the main method of fishing which brought in about 41.6% of the local catch followed by Bottom Fishing with 20.1%.

Section Fourteen

COMMERCE AND TRADE

This section covers data on trade, government purchases, and business registration.

International Merchandise Trade Statistics is classified and presented using the 2012 Harmonized Code System at the two-digit level. The American Samoa Balance of Trade in fiscal year 2019 recorded a deficit of \$358.4 million. Imports rose by 8.9% while exports dropped by -6.4%. Imports include government purchases worth \$6.4 million, value of fish brought in for processing at the canneries at \$282.8 million, and value of merchandise brought in for final consumption and intermediate use at \$422.3 million. Another sector of merchandized imports not captured in the Trade Balance series is the Post Exchange (PX). Export is primarily canned tuna and associated products. In 2019 total export was worth \$353.2 million: a slight drop from 2018.

Except for the United States, American Samoa trading with other countries is one directional: we import and no export. American Samoa's leading trade partners are the United States, Singapore, New Zealand, Fiji, Korea, Samoa, and Australia in that order. The Department of Commerce and Treasury continued to collaborate on the improvement of International Merchandise Trade Statistics to capture imports, exports, and re-exports to include value, quantity and unit of measure, country of import and origin, destination, as well as the classification of commodities in the HS coding system.

Business License issuance continued to decline since 2014 with 3,787 to 2,818 in 2018 (a drop of 26%). However, it rose again in 2019 with 2,986 to 3,240 in 2020 (an increase of 8.5%).

Section Fifteen

ELECTRICITY AND WATER

This section presents statistical data on electricity production, consumption, number of electric meters and water usage.

Electricity production continued to increase in the last ten years. Total gross kWh of electricity generated in 2020 amounted to 173.6 million and about 5.3 million kWh were used in the production of electricity, netting 168.3 million kWh for sale. Only 150.5 million kWh were sold and the line loss amounted to 17.8 million kWh. For the second year in a row, line loss was above 10% of the net electricity production. Fuel efficiency slightly dropped to 15.1 kWh per gallon in 2020. Lube efficiency also increased in the same period. The average weighted fuel cost per gallon dropped from \$2.66 in FY2020 compared to \$2.91 in FY2019 and \$2.79 in FY2018. The average monthly Fuel Surcharge dropped to 0.213 in FY2020 versus the monthly average of 0.234 in FY2019. This favorable trend in Fuel Surcharge has a direct correlation to electricity cost paid by consumers.

The number of meters remained at above 12,100 in FY2020 due mainly to a drop of 120 meters of Residential Usage – another direct correlation to unoccupied and unattended residential housing. The majority of meters were for Residential users; about 86.0% and consumed 32.8% of electricity followed by Commercial users with 8.8% of meters and consumed 28.4% of kWh. With only 4 Large Power users, they consumed 17.1% of total electricity. Government including ASPA accounted for 626 meters consuming 21.8% of electricity in FY2020.

In FY2020, about 144 million gallons of water were sold by the American Samoa Power Authority (ASPA).

SOURCE: 2010 Census Demographic Profile of American Samoa.

Section Sixteen**NATIONAL ACCOUNTS AND GROSS DOMESTIC PRODUCT**

This section presents statistics on the economy of American Samoa as measured by the national accounts system to include Gross Domestic Products for American Samoa as prepared and released by the U.S. Bureau of Economic Analysis (BEA). The BEA under the U.S. Department of Commerce, through the Statistical Improvement Program funded by the Office of Insular Affairs (OIA) of the U.S. Department of the Interior, developed formal methodologies for measuring the GDP of American Samoa and other Island Areas, Guam, CNMI and U.S. Virgin Islands. Since 2010, BEA has released annual estimates of gross domestic product (GDP) for American Samoa from 2002-2020. Statistical data needs and requirements of the GDP projects were furnished by the Island Areas governments.

According to a statistical release from BEA, the 2020 GDP for American Samoa at current cost was estimated at \$709 million, an increase of 9.4% from the 2019 GDP of \$648 million. Real GDP, which is GDP adjusted to remove price changes was estimated at \$636 million compared to Real GDP of \$612 million in 2019. In real terms, the economy grew at about 3.9% in 2020. The receipt of direct payments to individuals and families due to the COVID-19 federal assistance and recovery resulted in this positive growth in the local economy. Personal Consumption Expenditure followed by the Government Consumption Expenditure and Gross Investment, made up the bulk of the GDP measure while Net Imports continued at a deficit with -\$218 million. Private Fixed Investment accounted for about \$44 million. For more information on GDP estimates for American Samoa, please visit the Bureau of Economic Analysis website www.bea.gov or DOC website: www.doc.as.gov.
