Statistical & Analysis Division

*Message from the Director*

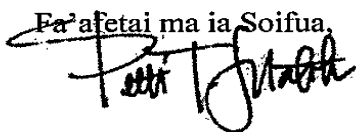

It is with great pleasure that I present the 2021 Statistical Yearbook for the territory of American Samoa, prepared by the Department of Commerce Statistics and Analysis Division. This edition is the thirty-ninth edition of this publication, which provided statistics and trends on the territory's demographic, social, and economic characteristics from censuses, surveys, and administrative records. I hope these data series on population, health, education, law enforcement, climate, land use, migration, trade, government finances, prices, employment, agriculture, utilities, and national accounts promote and perpetuate interest in the pursuit of happiness and wellbeing of the people of American Samoa. The Statistical Yearbook has long been popular among local policymakers, business leaders, and civil organizations.

The collection and tabulation of the raw data summarized in the Statistical Yearbook would not be possible without the cooperation of the many local and federal government agencies, private businesses, and individuals. The Department of Commerce wishes to express our deepest appreciation to those who have contributed to this edition, and I look forward to any valuable input submitted to improve the quality and contents of the yearbook.

I hope that you will find this publication useful and informative for good governance, sound decision-making, and evidence-based planning.

For your suggestions, a comment form is provided at the end of this book.

*Fa'afetai ma ia Soifua.*

## Section One

### POPULATION

Population counts, densities, and annual growths for Pacific Island countries, as well as geographic, demographic, social, and economic characteristics from the American Samoa federal censuses, are provided here.

The federal government's decennial count of the local population showed a continuous decline. The last census count of American Samoa in 2020 resulted in a drop in the numbers from 55,519 in 2010 to 49,710 in 2020, despite much higher population estimates put out by the Statistics Division. These estimates were derived from historical trends going back to 1990, on natural growths (births minus deaths) and travel statistics (arrivals and departures). The Statistics Division, while still maintaining the Balancing Equation method for computing estimates, resorted to using current administrative counts instead of historical trends. The big gap in census counts versus population estimates could only happen if there are significant census undercounts or very poorly maintained administrative data, especially in travel statistics. None of the said scenarios have been statistically proven and will require further scientific assessment of the usefulness of these statistical data.

The mid-year population estimate for 2021 derived from the Balancing Equation method using current administrative records showed 51,561 people in American Samoa on June 30<sup>th</sup>. The COVID\_19 Pandemic and its global impacts affected census enumeration in 2020 for the whole United States and with the American Samoa enumeration, the house-to-house personal interviewing halted for about three months due to the lockdown and COVID restrictions.

The U.S. Census Bureau has released the 2020 demographic profile of American Samoa. While geographic counts are available for villages, counties, and districts, demographic data are available for the territorial population without any lower geographic details. About 64% of the residents lived in the Western District while only 34% lived in the Eastern District and only about 2% lived in the Manu'a District. Tualauta is the most populated county holding about 46% of the territorial population or 72% of the Western District population. Maoputasi is the next most populated county holding about 17% of the territorial population or 50% of the Eastern District population.

The Sex Ratio remained at 103.3 males for every 100 females while the median age increased by five years to 27.7 for both; 27.6 males and 27.8 females. About 57.6% of the residents were born in American Samoa followed by 28.6% born in (Western) Samoa, and born in the United States and other territories at 6.1%. Aside from the (Western) Samoa born with 13,952, the next largest foreign-born group was the Philippines with 1,291 count. The population is still ethnically Samoan with 83.2%. There were 9,834 households in American Samoa in 2020: 88.2% were family householders and 6.4% of family households had children under the age of 18 years. There were 1,656 female households with no husband present and 33.0% of them had their own children under 18 years. There were 1,163 (11.8%) non-family households. The average household size is 5.0 persons and the average family size is slightly higher at 5.4%.

## Section Two

### **VITAL AND HEALTH STATISTICS**

This section presents data on births, deaths, life expectancy, marriages, diseases, patient visits and hospital discharges.

Births continued to decline while deaths continued to climb. The LBJ Tropical Medical Center reported 706 births and 331 deaths in 2020. Crude Birth Rates per 1,000 live births dropped from about 20.0 ten years ago to 13.7, while the Crude Death Rate per 1,000 deaths moved upward to 6.4. Infant Mortality Rate of 9.9, Neonatal Mortality Rate of 7.1, and Fetal Death Rate of 7.1 per 1,000 live births in 2021. Births have dropped from around 1,300 ten years ago to only 706 in 2021. Teen births (ages 19 years and below) made up about 10.5% of total births in 2021. Population natural growth is defined as total births minus deaths. The natural growth of the population in 2021 was 375. Therefore, only 375 people were added to the resident population in 2020 from natural growth.

The five leading causes of death in 2021 were (1) Heart Disease; (2) Malignant Neoplasm (cancer); (3) Septicemia (blood poison); (4) Influenza/Pneumonia; (5) Hypertension. Cerebrovascular diseases came after Hypertension as the sixth highest cause of death. in that order. Notifiable Diseases have been updated since 2014; however, 2015 and 2016 data are still missing. Communicable diseases have dropped from about 5,100 in 2019 to 3,900 in 2020 despite the COVID-19 pandemic in 2020. There was also a big drop in Influenza/Flu cases reported in 2020.

The number of out-patient visits continued to climb in the last five years, to 130,018 visits in 2021. Renal Dialysis and Mental Health clinics seem to be the fastest growing clinics in the last decade. The average length of stay at the LBJ Medical Hospital in 2021 was 6.7 days and the occupancy rate was 56.5%. The Vital Statistics Office reported 291 marriage licenses issued in 2021, another increase of 36% from last year.

### **Section Three**

#### **EDUCATION**

This section presents statistical information on Public and Private educational institutions, enrollment, and educational achievement.

The Department of Education statistics have been updated with new information since 2018. Current enrollment has been on a downward trend since 2010 when enrollment has reached 20,000 compared to only 14,300 in 2021 (a decline of almost 30% in school enrollment). Educational institutions however remained about the same in the ten-year period which means that the average institutional size and classroom size have reduced significantly. Likewise, the number of teachers in public schools continued to drop from 1,100 to about 900 in the same period.

Corresponding to the declining births, all levels of education have dropped. Elementary Schools made up about 52% of total enrollment, followed by High Schools with 28%, Pre-School with 10%, K-Programs with 5%, and the ASCC with another 5%. The ASCC enrolled 1,310 students in 2021 compared to over 2,000 ten years ago. There were 618 full-time students compared to 692 part-time students. A significant number of continuing or returning students was reported in 2021 while new students dropped to about 350.

The 2020 Census of American Samoa included questions on school enrollment of those 3 years and over and the educational attainment of the resident population. There were a lot more people who stated that they were enrolled in schools from the Census than reported in government administrative records. In the 2020 Census, enrollment was about 16,800 compared to the 2020 DOE data of about 15,100 (a difference of about 1,700 in the two series). Educational attainments have improved tremendously with 88.7 percent of those 25 years and over graduating from high school compared to 82.1 percent in 2010. Also, 13.3 percent had Bachelor's Degrees or higher degrees versus about 10 percent in 2010.

## Section Four

### LAW ENFORCEMENT

This section provides statistics on Law and Order, containing data on crime, traffic, accidents, firearm registration, correctional facility, population, fire, and court activities.

The Department of Public Safety reported 222 Part I offenses in FY2021. Part I Offenses include eight crime categories: murder and non-negligent homicide, rape (legacy & revised), robbery, aggravated assault, burglary, motor vehicle theft, larceny-theft, and arson. The most crimes committed during FY2021 were larceny, burglary, and assault (1st and 2nd). DPS also reported 2,219 Part II Offenses in FY2021, an increase of 22.3% from FY2020. Part II Offenses are other assaults, forgery and counterfeiting, fraud, embezzlement, stolen property (buying, receiving possessing), vandalism, weapons (carrying, possessing, etc.), drug abuse violations, gambling, offenses against the family and children, driving under the influence, liquor laws, drunkenness, disorderly conduct, vagrancy, suspicion, curfew, loitering laws (person under age 18), runaways (person under age 18) and all other offenses not specified. Of the Juvenile population, Part I Offenses reported in FY2021 amounted to 35 while Part II Offenses registered at 63. The two leading offenses by the Juvenile population for all crimes reported were Assault and Disorderly Conduct.

Traffic accidents again went up in FY2021 by about 7.5%. There were 714 traffic accidents reported in FY2021 compared to 664 in FY2020, and 24 people suffered injuries with only one fatality. A total of 138 firearms were registered in FY2021 with a high percent of pistol registration.

The average monthly inmate population in FY2021 was 258 compared to a monthly average of 240 in FY2020. Over 50% of the inmates were US Nationals, 29% of Samoa citizens, 12% Tonga citizens and 9% others citizens. There were 72 fires reported in FY 2021: 63 Residential, 6 Commercial and 3 Industrial. The High Court reported 328 cases filed in FY2021. There were 1,075 cases pending from FY2020 and 210 cases were disposed of in the current fiscal year.

## **Section Five**

### **CLIMATE**

This section presents climate data for American Samoa.

American Samoa has a tropical maritime climate with abundant rain and warm, humid days and nights. The average temperature in 2021 was recorded at 82.0 degrees Fahrenheit; a slight drop from 82.2 degrees in 2020. Throughout the past ten years, average temperatures remained within the range of 81.2 to 82.5 degrees. The hottest month was January with an average of 82.7 degrees Fahrenheit with August the coolest month with an average of 80.3 degrees Fahrenheit.

The year 2021 is the driest year throughout the 10 year period with total rainfall amounted to only 110.9 inches; a significant drop of 73% from the previous year. In 2021, the month of January recorded the most rainfall with 17.62 inches and the month of September was the driest month with only 3.27 inches of rainfall.

The two main seasons in Samoa are the wet and dry seasons; sometimes referred to as “summer” and “winter”. The south coast receives, on an annual basis, approximately twice as much rain as the north coast. Summer or wet season is also the cyclone season and runs from November through April. Winds tend to be either calm or mainly out of the north. Although heavy rain, showers and long rainy periods can occur any month of the year, torrential downpours are most common, and humidity is at its peak during the summer months. Winter or dry season is also Trade Wind season and runs May through October. The Trade Winds are mainly south-easterly but can turn to a more easterly direction at times. During the winter months the Trade Winds tend to blow rather incessantly and can range from anywhere from mild to rather strong at times. However, the Trade Winds can also blow during any month of the year, not just the winter months, or they might unexpectedly stop blowing in the middle of the Trade Wind season, often for days at a time

## Section Six

### **LAND USE/REGISTRATION, HOUSING CHARACTERISTICS, AND BUILDING PERMITS**

This section presents statistics on land use, land ownership registration and tenure, housing characteristics, building permits, type, and value of construction activities. American Samoa has a total land area of 48,767 acres and about two-thirds of the land is steeply sloping and virtually inaccessible. Land Registration at the Office of the Territorial Registrar recorded an additional 63 acres registered in 2021 resulting in approximately 8,048 acres of registered land in American Samoa. The additional 63 acres included 44 acres of Individually Owned Land and 19 acres of Communally Owned or Native land. Communal Land holds 27.1% of all registered land followed by Individually Owned Land at 26.2%, Government-Owned Land at 20.5%, Freehold Land at 13.3% and Church-Owned Land at 12.8%.

The number of housing units went up from 10,963 in 2010 to 11,807 in 2020: an increase in the housing stock of 1.7% despite a drop in the resident population. About 83.3% of housing units were occupied and 16.7% were vacant units. A housing unit is a house, an apartment, a mobile home or trailer, a group of rooms, or a single room occupied as separate living quarters or, if vacant, intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants live and eat separately from any other persons in the building, and which have direct access from outside the building or through a common hall. Of the 9,834 occupied units, 71.1% were owner-occupied and 28.9% were renters.

Housing units are characterized as single detached units, attached units, 2 houses, and 3 or more houses. Most housing units are single one-unit detached (80.1%) while only 4.7% live in 2 or more houses. Those living in apartment-type housing (single one-unit attached), although small, have gone up by about 6.3% in the last decade.

The number of building permits issued in 2021 was recorded at 222; 133 for new construction and 89 for extension, repair, and alteration, all valued at \$12.4 million.

## **SECTION SEVEN**

### **INTERNATIONAL ARRIVALS AND DEPARTURES**

This section presents statistics on international arrivals and departures by purpose of travel and citizenship of travelers, tourism markets, and net travelers.

The COVID-19 pandemic caused an unprecedented disruption in international travel resulting in a massive decline in international movements and a pause in tourism and related activities. Travel restrictions and border lockdowns to contain the spread of the virus had huge economic and social impacts, affecting direct travel-related jobs and micro to medium-sized enterprises.

A slight increase in total arrivals was seen in 2021 but still far behind normal activities in pre-pandemic years. A total of 11,779 departed resulting in a net gain of 1,884 travelers in 2021. The majority of travelers were mainly crews and residents moving back and forth. There were over 8,000 crews arrived and 4,400 left resulting in a net-in of 3,600 crews while about 4,100 residents arrived with about 6,500 departed giving a net-out of about 2,400.

## **Section Eight**

### **ELECTION**

This section presents data on elections in American Samoa including voter registration, and election results. Election participation by Representative District is further broken down by village, age, and gender of the voting population. The 1994 General Election was the first election conducted with a new electronically processed Voter Registration System requiring a more scrutinized documents verification process of all registered and new voters. The automation process took to the 1994 poll two separate voter registration rolls for the old and the new system. As a result, the Election Rolls dropped from over 15,000 voters in the 1992 election to a little over 11,000 registered voters in the 1994 election. Since then, the American Samoa Voter Registration system maintained all electronically processed documents including Federal Post Card Applications (FPCA) for overseas military and college residents

Voter Registration has dropped when comparing Gubernatorial Elections in 2016 and 2020. A total of 16,341 voters were registered for the 2020 Gubernatorial Election, and although increased from the 2018 Election, the official roll declined by 5% compared to the 2016 Gubernatorial Election. This pattern is seen in the past 20 years of territorial elections as much higher voter registration occurred in gubernatorial election years only. The 2020 election recorded the highest voter turnout of the past four elections – 73.7% exercised their right to vote. Manu’a II, Saole, Alataua, and Swains’ voters all reported over 80% of voter turnout. The lowest turnout was Representative District No. 10 - Ma’oputasi with 67.8%.

## **Section Nine**

### **GOVERNMENT FINANCE**

This section presents statistical data on government finance, revenues, and expenditures.

The American Samoa Government collected \$382.8 million in revenue and spent \$402.6 million in FY2021, resulting in a current operating deficit of -\$19.9 million. The overall government financial statements in the past 10 years reflected a positive cumulative year-end fund balance surplus of \$75.2 million at the end of FY2021. The favorable government financial condition was a result of another bond sale in 2021 of \$48 million.

Federal Grants and Assistance received in FY2021 amounted to \$260.5 million (68.1%) while local revenue collection amounted to \$108.8 million (28.4%) and \$1.1 million received from Tobacco Proceeds. A total of \$90.4 million of taxes was collected with another \$8.0 million received from Fines & Fees, \$7.0 million from Charges for Services, \$6.8 million from Indirect Costs, and the rest from other local sources.

Total Government spending amounted to \$402.6 million in FY 2021. Education and Culture had the highest functional category amount with 28.2 percent of total spent, followed by Health and Welfare with 27.1 percent and General Government with 19.6 percent. By using the 2020 census count of 49,710 and the FY2020 functional expenditure, the Per Capita cost of Educational and Culture amounted to \$1,628 while the Per Capita cost of Health and Welfare amounted to \$2,235. Providing health care is more expensive than the rest of the functional categories of government spending.

## Section Ten

### **LABOR FORCE, EMPLOYMENT AND EARNINGS**

This section presents statistical data on labor force participation, employment, and earnings. In 2020, current employment was estimated at 16,399; a drop of about 2.3% from the 2019 estimate. Government employment accounted for about 40.3% of all employment and 59.7% of Private Sector jobs including the Cannery. Government jobs continued to climb in the last 5 years.

The Fair Labor Standard Act - Minimum Wage Act of 2007 (Public Law 110-28), as amended, applies minimum wage rates to 18 Industry Classifications in American Samoa. This law also provides for additional increases in the minimum wage of \$0.40 per hour to occur every three (3) years (e.g., 2018, 2021, 2024, etc.) on September 30, until reaching the minimum wage generally applicable in the U.S. which is now at \$7.25 an hour.

In 2010, the median household income was \$23,892. Close to \$350 million worth of income from all sources was received by all residents of the territory in 2010. Thus, the per capita income was \$6,311. In 2010, about 57.8 percent of all persons or 54.4 percent of families were below the national poverty level. Of the 3,875 grandparents reported to have lived with their grandchildren, 66 percent of them were responsible for taking care of grandchildren.

## Section Eleven

### **CONSUMER PRICES AND EXPENDITURES**

This section presents statistics on the local consumer price index, inflations, and household expenditures.

The American Samoa Consumer Price Index (CPI) is designed to measure changes in the prices of commodities and services normally purchased by the community. The American Samoa CPI (like the U.S. CPI) is based on the concept of a representative "market basket"; a selection of goods and services normally purchased by local consumer units. The CPI was first developed during the early part of 1974. The selection of the market basket weights distribution was based on the "General Statement of Articles of Import of Merchandise in American Samoa from July 1970 - June 1971". The CPI weight distribution was later updated using household expenditure patterns derived from the Household Income and Expenditure Survey (HIES) conducted by the Economic Development and Planning Office (EDPO) in 1982. The CPI weights were further revised and adjusted using the 2005 and 2015 HIES. The next household income and expenditure survey will be carried out in 2025 and will be the sixth survey in this series.

The last CPI rebase was carried out at the end of 2016 and a total of approximately 210 selected items were divided into 9 major groups for measurement of price movements on a quarterly basis. The 2021 CPI at year-end was registered at 113.7 points: an increase of 10 points from the 103.7 index at year-end 2020. Inflation gradually climbed from 1.4 percent at the beginning of the year to 9.7 percent at year-end 2021: almost two years of the global pandemic. Food, Transportation, and Housing were the fastest-growing groups in the local CPI.

The last HIES was conducted on April 1st, 2015. Detailed household expenditure tables are provided by groups and subgroups. Total household spending in American Samoa in 2015 amounted to \$355 million. Food is the number one expenditure group with 26.1%, followed by the Housing group at 25.0% and the Other Goods and Services group at 19.9%. This last group included expenses on Church and Cultural relations. The impact of the Fa'aSamoa and its cultural functions contributed to the higher Food cost.

## Section Twelve

### **COMMUNICATION AND TRANSPORTATION**

This section presents statistical data on communication and transportation services including vehicle registration and driver licenses, vessel and cargo movements, and air traffic and aircraft operations.

The number of telephone landlines has reached 10,284 in 2021 with 552 miles of telephone cables. Cellular instruments dropped to 16,678 in 2021 while phone cards continued to drop to a little over 10,000 purchases. Likewise, the number of e-charges also dropped by about 35% compared to 2020. Overseas calls had dramatically decline to only 247,000 calls resulting in 899,400 minutes. Both internet services and text messaging services have significantly increased this year.

Wealth accumulation and prosperity has never before been seen in terms of investments such as cars and housing. In 2021 the number of vehicle registration has surpassed 10,000; an annual increase of 8%. A total of 12,167 vehicles were registered in 2021 compared to 11,287 vehicles in 2020. Commercial vehicles accounted for close to 10% of registration. Bus registration dropped while rental vehicles, taxis, and cargo registration increased. Government vehicle registration remained at 650. There has been an almost 20% increase in the number of driver's licenses and permits.

Incoming and outgoing vessels continued to drop in the last 5 years due to the pandemic and border. In 2021, over half of the incoming vessels were fishing boats followed by freighters while 24 tankers anchored and no cruise ships.

Air traffic operations began to open up in 2021 resulting in half as many flights landed compared to 2020, and with only 5,000 passengers deplaned.

## Section Thirteen

### **AGRICULTURE AND FISHING**

This section presents statistics on agricultural land, farms, farm tenures, field crops, livestock, and local fishing activities.

The administrative scope in the conduct of the Agricultural Census changed after 1990 where a supplemental agricultural form was attached to the regular Population and Housing Census since 1920. The first Agricultural Census conducted every five years by the USDA-NASS agency was in 1998. In 2013, USDA-NASS did not have enough funds to carry out the agricultural census and the recent census was conducted in 2018. This administrative change is reflected in the historical trend of agricultural activities where the number of farms and measurable quantities increased significantly.

The 2018 Agricultural Census showed that the number of farms went up but land in farms dropped. Only 14,404 acres of land were in farms but a total of 6,329 farms, suggesting that more people were returning to farming with much smaller farm lots. As such, the average size of a lot dropped from 3.3 acres to 2.3 acres compared to the Agriculture Census of 2008. Almost all farms were cropland farms. The average age of a farm operator was 54 years old and only 964 worked for pay or paid farm workers. The total worth of agricultural farms in the 2018 Agricultural Census was estimated at \$44 million. Farms with less than \$100 of sales (presumably the majority of subsistence farming) consumed almost \$25 million worth of agricultural produce. Only 235 big farms (with \$10,000 or more in sales) sold \$7.5 million worth of produce. Local agriculture is mainly for family consumption where 75% of all produce were for family consumption while only 25% is sold locally with hardly any indication of agricultural exports to foreign markets. Fruits and Nuts accounted for 46% of the total value of agriculture followed by Field Crops with another 41%. Fish caught in the ocean, valued at \$2.6 million and was mostly sold to the public. Chicken and Chicken Eggs were mainly for family consumption with less than 10% going to commercial sales. The Manu'a District has 30.3% of the total land area but only 1.8% of the land is in agriculture; Eastern District has 32% of the total land area and 30.4% is in agriculture while the Western District has 36.8% of the total land area with 51.8% in agriculture.

The local Department of Agriculture has not provided new information regarding local agricultural produce sold since 2016. Fishing activities continued to decline as the number of local fishermen and estimated catch dropped in FY2021. Longlining remained the main method of fishing which brought in about 41.0% of the local catch followed by Trolling with 28.9%.

## Section Fourteen

### **COMMERCE AND TRADE**

This section covers data on trade, government purchases, and business registration.

International Merchandize Trade Statistics is classified and presented using the 2012 Harmonized Code System at the two-digit level. The American Samoa Balance of Trade in fiscal year 2021 recorded a deficit of -\$573.9 million. Imports rose by 15.4% while exports dropped by -24.1%. Imports include government purchases worth \$10.9 million, value of fish brought in for processing at the canneries at \$256.1 million, and value of merchandise brought in for final consumption and intermediate use at \$617.3 million. Another sector of merchandized imports for sales not captured in the Trade Balance series is the Post Exchange (PX). Export is primarily canned tuna and by-products. In 2021 total export was worth \$310.4 million; a drop of -\$98.6 million from the 2020 exports. American Samoa trading with other countries is a one directional flow resulting in more imports and without exports.

Except the United States received all shipments of canned tuna products processed and produced locally. Other American Samoa trade partners are Korea, Fiji, New Zealand, China, Samoa, Australia, and Singapore. The Department of Commerce and Treasury continued to collaborate on the improvement of International Merchandise Trade Statistics to capture imports, exports, and re-exports to include value, quantity, and unit of measure, country of import and origin, destination, as well as the classification of commodities in the HS coding system.

Business License issuance slightly increased in 2021.

## Section Fifteen

### **ELECTRICITY AND WATER**

This section presents statistics on electricity production, consumption, number of electric meters and water usage.

Electricity production continued to increase in the last ten years. Total gross kWh of electricity generated in 2021 amounted to 176.3 million kWh with about 4.2 million kWh used in the production of electricity, netting 172.1 million kWh for sale. However only 152.7 million kWh were sold and the line loss amounted to 19.3 million kWh. While electricity production steadily increased, line loss also continued to climb and for the third year in a row, line loss amounted to over 10% of the total electricity production. Fuel efficiency remained at 15.1 kWh per gallon in the last two years while Lube efficiency increased by 6.9% in FY2021. The average weighted fuel cost per gallon dropped again to \$2.41 in FY2021 from \$2.66 in FY2020 and \$2.91 in FY2019. Fuel Surcharge also dropped in FY2021 to \$0.194 from \$0.213 in FY2020 and \$0.234 in FY2019. This favorable trend in Fuel Surcharge has a direct correlation to electricity cost paid by consumers.

The number of meters increased to 12,254 in FY2021 due mainly to an increase of 109 meters of Residential Usage. The majority of meters were for Residential Users; about 86.0% and consumed 34.7% of electricity followed by Commercial Users with 8.9% of meters and consumed 28.1% of total kWh. With only 5 Large Power Users, they consumed 15.1% of total electricity. Government including ASPA, accounted for 640 meters consuming 22.2% of electricity in FY2021.

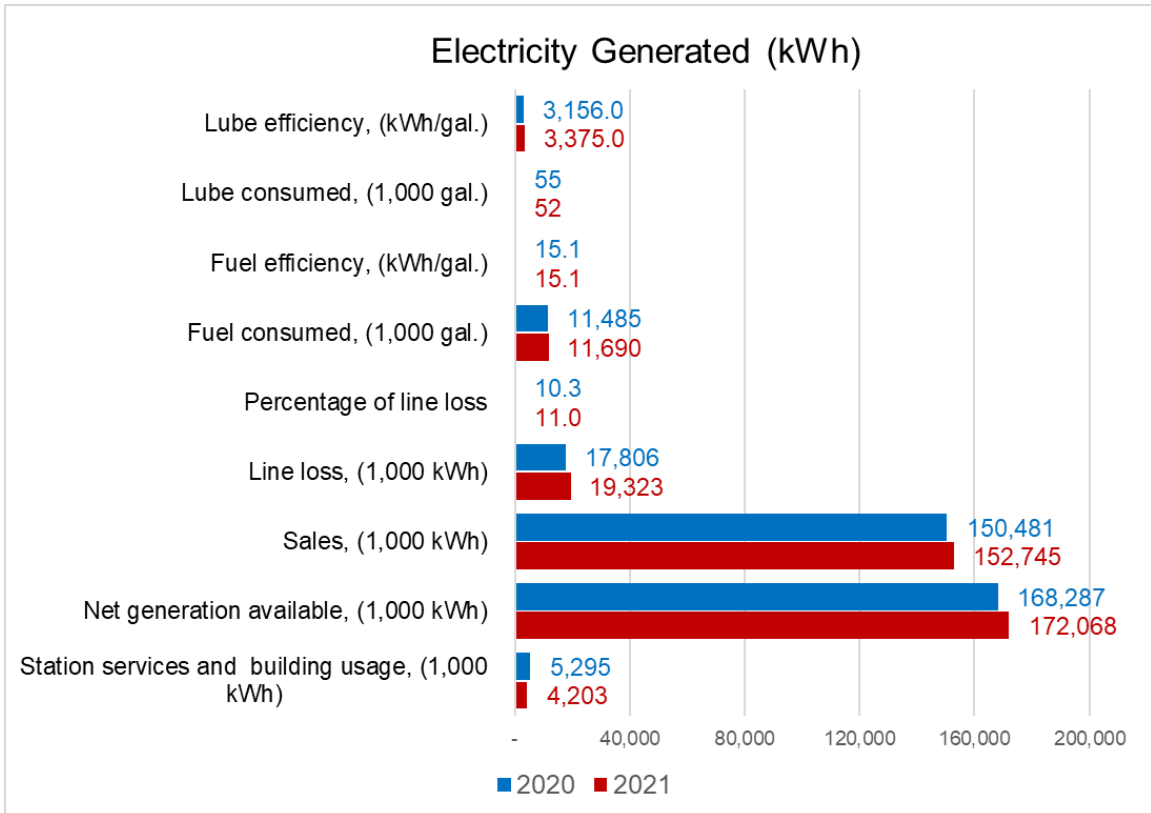

In FY2021, about 142.4 million gallons of water were produced by ASPA and only 58.5 million gallons were sold.

## Section Sixteen

### **NATIONAL ACCOUNTS AND GROSS DOMESTIC PRODUCT**

This section presents statistics on the economy of American Samoa as measured by the national accounts system to include Gross Domestic Products for American Samoa as prepared and released by the U.S. Bureau of Economic Analysis (BEA). The BEA under the U.S. Department of Commerce, through the Statistical Improvement Program funded by the Office of Insular Affairs (OIA) of the U.S. Department of the Interior, developed formal methodologies for measuring the GDP of American Samoa and other Island Areas, Guam, CNMI and U.S. Virgin Islands. Since 2010, BEA has released annual estimates of gross domestic product (GDP) for American Samoa from 2002-2021. Statistical data needs and requirements of the GDP projects were furnished by the Island Area governments.

According to a statistical release from BEA, the 2021 GDP for American Samoa at current cost was estimated at \$709 million, a drop of -1.7% from the 2020 revised GDP of \$716 million. Real GDP, which is GDP adjusted to remove price changes was estimated at \$631 million compared to a revised Real GDP of \$643 million in 2020. In real terms, there seemed to be a local economic contraction of about 1.7% in 2021.

The receipt of direct payments to individuals and families due to the COVID-19 federal assistance and recovery resulted in GDP retention above \$700+ million in the last two years. Personal Consumption Expenditure followed by Government Consumption Expenditure and Gross Investment, made up the bulk of the GDP measure while Net Exports of Goods and Services again remained negative at a current deficit of -\$391 million. Private Fixed Investment accounted for about \$87 million as COVID-19 recovery funds became available.

For more information on GDP estimates for American Samoa, please visit the Bureau of Economic Analysis website <http://www.bea.gov> or DOC website: [www.doc.as.gov](http://www.doc.as.gov).
