

AMERICAN SAMOA STATISTICAL YEARBOOK 2022

Message from the Director

It is with great pleasure that I present the 2022 Statistical Yearbook for the territory of American Samoa, prepared by the Department of Commerce Statistics and Analysis Division. This edition is the thirty-ninth edition of this publication, which provided statistics and trends on the territory's demographic, social, and economic characteristics from censuses, surveys, and administrative records. I hope these data series on population, health, education, law enforcement, climate, land use, migration, trade, government finances, prices, employment, agriculture, utilities, and national accounts promote and perpetuate interest in the pursuit of happiness and wellbeing of the people of American Samoa. The Statistical Yearbook has long been popular among local policymakers, business leaders, and civil organizations.

The collection and tabulation of the raw data summarized in the Statistical Yearbook is only possible with the cooperation of many local and federal government agencies, private businesses, and individuals. The Department of Commerce wishes to express our profound appreciation to those who contributed to this edition. I look forward to any valuable input submitted to improve the quality and contents of the yearbook.

I hope that you will find this publication helpful and informative for good governance, sound decision-making, and evidence-based planning.

A comment form is provided at the end of this book for your suggestions.

Fa'afetai ma ia Soifua,

Patti T. Matila

Director, Department of Commerce

TABULAR PRESENTATION

Explanatory Notes: The following symbols used in the tables throughout this publication are explained in the enclosed form in footnotes to the tables where they appear.

- Represents zero or rounds to less than half the unit of measurement shown
- .. Not available or not applicable
- (E) Estimates
- (P) Preliminary
- ® Revise
- (D) Data withheld to avoid disclosing data for individual's farm

Fa'alavelave – Samoan cultural events

***Calendar Year is used unless otherwise specified**

Head notes immediately below table titles provide information for correct interpretation or evaluation of the tables as a whole or for a major segment of it.

Unit indicators (“In thousands,” “In millions of dollars,” etc.) are usually given as the first element of the head notes. In tables with several units, the unit indicators are generally given in the stub in the column headings.

Footnotes below the bottom rule of tables give information relating to specific items, figures, or symbols within the tables. Details may not add up due to rounding.

All annual statistics should be understood as referring to calendar years unless otherwise indicated.

Government Fiscal Year starts from October of the previous year to September of the current year.

To Request a Copy of the Yearbook

Copies of the yearbook are available in electronic format and hard copy. However, hard copies are limited and only available upon special request. You can download a copy in PDF on our DOC website: www.doc.as.gov or email you by contacting the Statistics and Analysis Division at 633-5155 or emailing americansamoostatistics@doc.as.gov.

Section One

POPULATION

This section presents statistics on the population of American Samoa, geographic counts, population densities, annual growth rates, and annual population estimates. Basic results of the recent Federal decennial census conducted in 2020 have been released, with more detailed crosstabulations to follow in 2023. A comparative population table of Pacific Island Countries of the most recent available censuses is provided.

The 2020 American Samoa census count of 49,710 showed another drop from the 2010 count of 55,519 (a decline of 5,809 persons or an annual percent drop of -1.1%), despite much higher population estimates published by the Statistics Division. Higher population estimates were derived from the historical trends in arrival and departure statistics and the natural growth of the resident population. The Population Balancing Equation method is still being used to make annual population estimates subject again to much-needed and better record keeping at the frontline government agencies controlling the American Samoa borders.

The mid-year population estimate for 2022 derived from the Balancing Equation method using current administrative records resulted in 51,269 people in American Samoa on June 30th (a slight decline from the 2021 estimate). The COVID-19 pandemic and its global impacts affected census enumeration in 2020 for the whole United States, and with the American Samoa enumeration, the house-to-house personal interviewing was halted for about three months due to the lockdown and COVID restrictions. The U.S. Census Bureau has released the 2020 demographic profile of American Samoa. While geographic counts are available for villages, counties, and districts, demographic data are available for the territorial population without any lower geographic details.

The Eastern District held the majority of the resident population from 1900 to 1980, then began the internal movement from East to West as newly developed land and availability for purchases, particularly in the Tafuna Plans area, opened up. The county of Tualauta alone increased its population twofold after the 1990 census count. Today, the Western District holds about 64% of the residents, 34% live in the Eastern District, and only 2% live in the Manu'a District. Close to half of the territorial population lived in Tualauta County (46% or 72% of the Western District population). Maoputasi is the second most populated county, holding about 17% of the territorial population or 50% of the Eastern District population. The Sex Ratio remained at 103.3 males for every 100 females, while the median age increased by five years to 27.7 for both: 27.6 males and 27.8 females. About 57.6% of the residents were born in American Samoa, followed by 28.6% in (Western) Samoa and in the United States and other territories at 6.1%. Aside from the (Western) Samoa born with 13,952, the next largest foreign-born group was the Philippines with 1,291 persons. The population is still ethnically Samoan, with 83.2%.

There were 9,834 households in American Samoa in 2020: 88.2% were family householders, and 6.4% of family households had children under the age of 18. There were

One thousand six hundred fifty-six female households with no husband present, and 33.0% of them had their own children under 18 years. There were 1,163 (11.8%) non-family households. The average household size is 5.0 persons, and the average family size is slightly higher at 5.4%.

TABLE 1.1. POPULATION, DENSITY AND GROWTH IN THE PACIFIC: 2020

Island group	Last census	Population as counted at last census	Mid-year population estimate (2020)	Land area (sq.kilo-meter)	Population density (people per sq.km.)	Annual growth rate (%)

Section Two

VITAL AND HEALTH STATISTICS

This section presents data on births, deaths, life expectancy, marriages, diseases, patient visits, and hospital discharges.

While births declined throughout the decade, they remained the same in the last two years. Deaths, however, continued to climb. 2022 the LBJ Tropical Medical Center reported 706 births and 399 deaths. Crude Birth Rates per 1,000 live births remained at 13.8, while the Crude Death Rate per 1,000 deaths increased to 7.8. Infant Mortality Rate dropped to 4.2, the Neonatal Mortality Rate to 1.4, and the Fetal Death Rate to 7.1 per 1,000 live births. Births have dropped from around 1,300 ten years ago to only 706 in 2022. Teen births (ages 19 years and below) accounted for 8.9% of total births, a 1.6 percentage point drop from the 2021 births. Population natural growth is defined as total births minus deaths. The natural growth of the population in 2022 was 307. Therefore, only 307 people were added to the resident population in 2021 from natural growth.

The five leading causes of death in 2022 were (1) Heart disease, (2) Influenza/pneumonia, (3) Malignant neoplasm (cancer), (4) Septicemia (blood poisoning), and (5) Cerebrovascular diseases. The first recorded COVID-19 death occurred in 2022, and 16 deaths were identified. A total of 5 Suicide deaths were recorded, a drop from 7 and 11 deaths in the last two consecutive years.

Notifiable disease data is poorly kept with non-standard and volatile record keeping. It is confusing to state that Communicable Diseases have dropped in the last two years. Still, the devastating drop in Influenza/Flu cases in the data series and the fact that Influenza/Pneumonia is the second largest cause of death is misleading. However, Whooping Cough and Influenza/Flu were the leading health complaints at the Medical Center. The number of out-patient visits dropped to 114,700 in 2022 compared to 130,000 visits in 2021. Renal dialysis has been the fastest-growing clinic in the last decade, while mental health clinics suddenly dropped four-fold in 2022. The average length of stay at the LBJ Medical Hospital in 2022 was 5.6 days, and the occupancy rate was 47.6%. The Vital Statistics Office reported 200 marriage licenses issued in 2022.

Life expectancy in American Samoa has dropped. The recently released 2022 Life Table for American Samoa after the 2020 census showed a drop in the average lives of males and females. A newborn male is expected to live 69.7 years, while a newborn female is expected to live 74.5 years. The 2010 Life Table had life expectancy values of 71.1 years for males and 78.8 years for females.

Table 2.1. VITAL STATISTICS: 2012 TO 2022

Year	Estimated population	Births	Deaths	Rates per 1,000 persons		Deaths under 1 year					
						Numbers			Rates per 1,000 live-births		
				Births	Deaths	Infant	Neonatal	Fetal	Infant Mortality	Neonatal Mortality	Fetal deaths

Section Three

EDUCATION

This section presents statistical information on Public and Private educational institutions, enrollment, and educational achievement.

Educational Institutions remained the same while enrollment continued downward from about 20,000 students ten years ago to only 15,000 in 2022 (a decline of over 30%). This could mean that, on average, there are fewer and fewer students per classroom in the education system. Likewise, the number of teachers in public schools continued to drop from 1,100 to about 800 in the same period.

In correlation to the decline in births, all levels of education have dropped. Elementary Schools comprised about 51% of total enrollment, followed by High Schools with 27%, Pre-School with 10%, K-Programs with 6%, and the ASCC with another 7%. The ASCC enrolled 1,389 students in 2022 compared to over 1,800 ten years ago. For the second year, there are more part-time students (541) than full-time students (509). While about 870 continuing or returning students were reported in 2022, only 177 new students attended the ASCC, a significant drop from about 350 new students in 2021.

The 2020 Census of American Samoa included questions on school enrollment of those three years and over and the educational attainment of the resident population. Many more people stated that they were enrolled in schools from the Census than reported in government administrative records. In the 2020 Census, enrollment was about 16,800 compared to the 2020 DOE data of approximately 15,200 (a difference of about 1,600 in the two series). Educational attainments have improved tremendously, with 88.7 percent of those 25 years and over graduating from high school compared to 82.1 percent in 2010. Also, 13.3 percent had Bachelor's Degrees or higher degrees versus about 10 percent in 2010.

Section Four

LAW ENFORCEMENT

This section provides statistics on Law and Order, containing data on crime, traffic, accidents, firearm registration, correctional facility, population, fire, and court activities.

The Department of Public Safety reported 336 Part I offenses in FY2022. Part I Offenses include eight crime categories: murder and non-negligent homicide, rape (legacy & revised), robbery, aggravated assault, burglary, motor vehicle theft, larceny-theft, and arson. The most crimes committed during FY2022 were larceny, burglary, and assault (1st and 2nd). DPS also reported 1,521 Part II Offenses in FY2022, a decrease of 31.5% from FY2021. Part II Offenses are other assaults, forgery and counterfeiting, fraud, embezzlement, stolen property (buying, receiving, possessing), vandalism, weapons (carrying, having, etc.), drug abuse violations, gambling, offenses against the family and children, driving under the influence, liquor laws, drunkenness, disorderly conduct, vagrancy, suspicion, curfew, loitering laws (person under age 18), runaways (person under age 18) and all other offenses not specified. Of the Juvenile population, Part I Offenses reported in FY2022 amounted to 41, while Part II Offenses registered at 65. The two leading offenses by the Juvenile population for all crimes reported were Assault and Disorderly Conduct, same as FY2021.

Traffic accidents again went up in FY2022 since 2019. There were 736 traffic accidents reported in FY2022 compared to 714 in FY2021, and 17 people suffered injuries with four fatalities. One hundred twenty-four firearms were registered in FY2022, with a high percentage of rifle registration.

The average monthly inmate population in FY2022 was 296, compared to a monthly average of 258 in FY2021. 48.3% of the inmates were US Nationals, 41.3% were Samoa citizens, 6.2% were Tonga citizens, and 4.1% were other citizens. There were 72 fires reported in FY 2021 and FY2022: 65 Residential, 5 Commercial, and 2 Industrial. The High Court reported 283 cases filed in FY2022. One thousand one hundred thirty-one cases were pending from FY2021, and 227 cases were disposed of in the current fiscal year.

Section Five

CLIMATE

This section presents climate data for American Samoa. American Samoa has a tropical maritime climate with abundant rain and warm, humid days and nights. The average temperature in 2022 was recorded at 81.8 degrees Fahrenheit, slightly dropping from 82.0 degrees in 2021. Throughout the past ten years, average temperatures remained at 81.3 to 82.5 degrees. The hottest month was April, with an average of 83.1 degrees Fahrenheit; August was the coolest month, with an average of 79.5 degrees Fahrenheit.

Total rainfall in 2022 amounted to 113.7 inches of rain, a slight increase of almost inches from 2021. February was the wettest month, with 19.9 inches of rain, and September was the driest month, with only 3.9 inches of rain. The two main seasons in Samoa are the wet and dry seasons, sometimes referred to as “summer” and “winter.” On an annual basis, the south coast receives approximately twice as much rain as the north coast. Summer or wet season is also cyclone and runs from November through April. Winds tend to be either calm or mainly out of the north. Although heavy rain, showers, and prolonged rainy periods can occur any month, torrential downpours are most common, and humidity is at its peak during summer. Winter or dry season is also Trade Wind season and runs from May through October. The Trade Winds are mainly south-easterly but can sometimes turn to a more easterly direction. During the winter, the trade winds blow incessantly, ranging from mild to relatively strong. However, the Trade Winds can also blow during any month of the year, not just the winter months, or they might unexpectedly stop blowing in the middle of the Trade Wind season, often for days at a time.

Section Six

LAND USE/REGISTRATION, HOUSING CHARACTERISTICS, AND BUILDING PERMITS

This section presents statistics on land use, land ownership registration and tenure, housing characteristics, building permits, and the type and value of construction activities. American Samoa has a total land area of 48,767 acres, and about two-thirds of the land is steeply sloping and virtually inaccessible. Land Registration at the Office of the Territorial Registrar recorded an additional 35 acres registered in 2022, resulting in approximately 8,083 acres of registered land in American Samoa. The other 35 acres included 32 acres of Individually Owned Land and 3 acres of Communally Owned or Native land. Communal Land holds 27.0% of all registered land, followed by Individually Owned Land at 26.5%, Government-Owned Land at 20.4%, Freehold Land at 13.3%, and Church-Owned Land at 12.8%.

The number of housing units went up from 10,963 in 2010 to 11,807 in 2020, an increase in the housing stock of 1.7% despite a drop in the resident population. About 83.3% of housing units were occupied, and 16.7% were vacant units. A housing unit is a house, an apartment, a mobile home or trailer, a group of rooms, or a single room occupied as separate living quarters or, if vacant, intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants live and eat separately from any other persons in the building and have direct access from outside the building or through a common hall. Of the 9,834 occupied units, 71.1% were owner-occupied, and 28.9% were renters. Housing units are single detached units, attached units, two houses, and three or more houses. Most housing units are single one-unit detached (80.1%), while only 4.7% live in 2 or more houses. Although small, those living in apartment-type housing (single one-unit attached) have increased by about 6.3% in the last decade.

The number of building permits issued in 2022 amounted to 241, 102 for new construction and 79 for extension, repair, and alteration, all valued at \$9.7 million.

Section Seven

INTERNATIONAL ARRIVALS AND DEPARTURES

This section presents statistics on international arrivals and departures by purpose of travel and citizenship of travelers, tourism markets, and net travelers. The COVID-19 pandemic caused an unprecedented disruption in international travel, resulting in a massive decline in international movements and a pause in tourism and related activities. Travel restrictions and border lockdowns to contain the spread of the virus had huge economic and social impacts, affecting direct travel-related jobs and micro to medium-sized enterprises.

A total of 39,465 arrivals and 39,891 departed, resulting in a net out movement of 426 travelers in 2022. The majority of travelers were mainly residents moving back and forth and crews. There were about 22,724 resident arrivals versus 24,388 departures, resulting in a net loss of about 1,664 residents. Likewise, close to 7,500 crews arrived and nearly 7,000 left, resulting in a net-in of about 500.

After two consecutive years of limited travel activities, visitor travels rebounded to at least a third of normal travel activities in 2022. Visitors included business, tourists, visiting relatives, employment, and in-transit travel. As in pre-pandemic years, the proportions of tourism market shares remained the same in 2022.

Section Eight

ELECTION

This section presents data on elections in American Samoa including voter registration, and election results. Election participation by Representative District is further broken down by village, age, and gender of the voting population. The 1994 General Election was the first election conducted with a new electronically processed voter registration system requiring a more scrutinized document verification process for all registered and new voters. The automation process took to the 1994 poll two separate voter registration rolls for the old and the new system. As a result, the Election Rolls dropped from over 15,000 voters in the 1992 election to a little over 11,000 registered voters in the 1994 election. Since then, the American Samoa Voter Registration system maintained all electronically processed documents, including Federal Post Card Applications (FPCA) for overseas military and college residents.

Voter Registration continued to drop in the last four elections. Likewise, voter turnout followed the same pattern as registration except for the Gubernatorial Election years, where the proportion of those who voted was about 70+ percent. Fourteen thousand three hundred thirteen voters were registered for the 2022 mid-election, reflecting a 12% drop in the Voter Roll. However, voter turnout in the 2022 election is much worse than any other election, where only 52.1% exercised their right to vote. The worst Representative Districts with below 50% turnout were Sua I (36.4%), Aitulagi (39.1%), Ma'oputasi No. 9. (40.2%), Tualauta (45.2%), Tualatai (49.2%), Sua II (49.9%). Maoputasi No.8. has the highest turnout with 65.9%, Manu'a I with 66.2%, and Manu'a ii with 62.5%.

Section Nine

GOVERNMENT FINANCE

This section presents statistical data on government finance, revenues, and expenditures.

The American Samoa Government in FY2022 collected \$550.8 million in revenue and spent \$537.5 million, resulting in a current operating surplus of \$13.3 million. Government revenue is primarily from Grants (\$398.7 million), General Fund local revenue (\$133.5 million), Bond Debt Service (\$14.6 million), and Capital Projects about (\$1 million). The government spent \$196.0 million on Education and Culture, \$129.7 million on General Government, \$113.3 million on Health and Welfare, \$31.6 million on Economic Development, \$20.5 million on Public Works, another \$20.4 million in Public Safety and the rest in Capital Outlays, Interest Payment, Principal Payment and Miscellaneous.

The overall government financial situation in the past ten years reflected a positive cumulative yearend fund balance surplus of \$40.9 million at the end of FY2022. The favorable government financial condition resulted from another bond sale in 2021 of \$48 million. Federal Grants and Assistance received in FY2022 amounted to \$398.7 million (72.4%), while local revenue collection amounted to \$133.5 million (24.2%).

Of the local revenue collections, income taxes amounted to \$78.0 million, with another \$29.5 million from excise taxes and the rest from other sources. Another \$12.7 million of excise taxes was collected under the Bond Debt Services fund type.

Section Ten

LABOR FORCE, EMPLOYMENT AND EARNINGS

This section presents statistical data on labor force participation, employment, and earnings. In 2022, current employment was estimated at 16,925; a slight drop of about - 0.5% from the 2021 estimate. Government employment accounted for about 42.7% of all employment, while 57.3% worked in Private Sector jobs, including the Cannery. Government jobs have continued to climb in the last five years.

As amended, the Fair Labor Standard Act - Minimum Wage Act of 2007 (Public Law 110-28) applies minimum wage rates to 18 Industry Classifications in American Samoa. This law also provides for additional increases in the minimum wage of \$0.40 per hour to occur every three (3) years (e.g., 2018, 2021, 2024, etc.) on September 30 until reaching the minimum wage generally applicable in the U.S., which is now at \$7.25 an hour. However, on July 1, 2021, the American Samoa Government raised the government minimum wage to \$7.25 an hour to match the US minimum wage.

In 2020, the median household income was \$28,352. All territory residents received nearly \$419 million of income from all sources in 2020. The per capita income rose to \$8,425, a significant increase from the per capita income of \$6,311 in 2010. In 2020, about 54.6 percent of all persons, or 50.7 percent of families, were below the national poverty level. Of the 3,974 grandparents reported to have lived with their grandchildren, 63.6 percent were responsible for caring for them.

Note: The Fair Minimum Wage Act of 2007 (Public Law 110-28) as amended, applies the minimum wage rates shown above to industries in American Samoa. This law also provides for additional increases in the minimum wage of \$0.40 per hour to occur every three (3) years (e.g. 2018, 2021, 2024, etc.) on September 30, until reaching the minimum wage generally applicable in the U.S.

The American Samoa Government raised the government's minimum wage from \$5.21 to the federal level of \$7.25 effective July 1st, 2021.

Section Eleven

CONSUMER PRICES AND EXPENDITURES

This section presents statistics on the local consumer price index, inflations, and household expenditures. The American Samoa Consumer Price Index (CPI) measures changes in the cost of goods and services generally purchased by the community. The American Samoa CPI (like the U.S. CPI) is based on the concept of a representative "market basket," a selection of goods and services normally purchased by local consumer units. The American Samoa CPI was first developed during the early part of 1974. The market basket weights distribution selection was based on the "General Statement of Articles of Import of Merchandise in American Samoa from July 1970 - June 1971". The CPI expenditure weight distribution was later updated using household expenditure patterns derived from the Household Income and Expenditure Survey (HIES) conducted by the Economic Development and Planning Office (EDPO) in 1982. The CPI weights were revised and adjusted using the 2005 and 2015 HIES. The following household income and expenditure survey will be carried out in 2025 and will be the sixth survey in this series. The last CPI rebase was carried out at the end of 2016, and approximately 210 items were selected and divided into nine major groups for measurement of price movements every quarter.

The COVID-19 pandemic and the Russia-Ukraine war triggered an inflationary push up to double-digit levels throughout 2022. The 2022 CPI at yearend registered at 124.7 points: an increase of 11 points from the 113.7 index at yearend 2021. Inflation climbed to a double-digit and remained there throughout 2022 but slightly dropped to 9.7 percent at yearend. The rise in global fuel costs affected all major CPI groups, primarily Transportation, Housing, and Food. These CPI major groups rose by an average of 11 percent each since the last quarter of 2021.

The last HIES was conducted in April 2015. Groups and subgroups provide detailed household expenditure tables. Total household spending in American Samoa in 2015 amounted to \$355 million. Food is the number one expenditure group with 26.1%, followed by the Housing group at 25.0% and the Other Goods and Services group at 19.9%. This last group included expenses on Church and Cultural relations. The impact of the Fa'aSamoa and its cultural functions contributed to the higher Food cost.

Section Twelve

COMMUNICATION AND TRANSPORTATION

This section presents statistical data on communication and transportation services including vehicle registration and driver licenses, vessel and cargo movements, and air traffic and aircraft operations.

The number of telephone landlines increased to 10,951 in 2022 from 10,284 in 2021, however, mileage of telephone cables remained at 552. Cellular instruments significantly dropped again for the second year in a row to 10,555 from 16,678 in 2021. While phone card purchasing is becoming obsolete (only 2,510 phone card purchases). Likewise, the number of e-charges also dropped by about 14% compared to 2021. Overseas Calls was not listed in the 2022 data series. Internet and text messaging services are the new means of communications and have significantly increased recently (although text messaging dropped but was much higher today than five years ago).

Wealth accumulation and prosperity measured in terms of investments in cars and housing continued to show positive growth. The number of private vehicle registrations has surpassed 10,000 in three years. A total of 12,098 vehicles were registered in 2022. Commercial vehicles accounted for close to 10% of registrations. Bus registration dropped while rental cars, taxis, and cargo registration increased. Government vehicle registration dropped to 600. Total driver licenses and permits dropped in 2022 due to a drop in private and commercial driver licenses. Incoming and outgoing vessels increased in 2022. Fishing vessels constituted over half the income vessels, followed by freighters with another 26 percent. Twenty-one tankers were arriving bringing fuel, and no cruise ships were visiting our shores. Air traffic operations began to open up in 2021, and in 2022, incoming flights doubled, bringing in over 30,000 passengers. Around half of those arriving passengers were from the Pago-Honolulu route.

Section Thirteen

AGRICULTURE AND FISHING

This section presents statistics on agricultural land, farms, farm tenures, field crops, livestock, and local fishing activities. The administrative scope in the conduct of the Agricultural Census changed after 1990 where a supplemental agricultural form was attached to the regular Population and Housing Census since 1920. The first Agricultural Census conducted every five years by the USDANASS agency was in 1998. In 2013, USDA-NASS did not have enough funds to carry out the agricultural census and the recent census was conducted in 2018. This administrative change is reflected in the historical trend of agricultural activities where the number of farms and measurable quantities increased significantly. The 2018 Agricultural Census showed that the number of farms went up but land in farms dropped. Only 14,404 acres of land were in farms but a total of 6,329 farms, suggesting that more people were returning to farming with much smaller farm lots. As such, the average size of a lot dropped from 3.3 acres to 2.3 acres compared to the Agriculture Census of 2008. Almost all farms were cropland farms. The average age of a farm operator was 54 years old, and only 964 worked for pay or paid farm workers. The total worth of agricultural farms in the 2018 Agricultural Census was \$44 million. Farms with less than \$100 of sales (presumably the majority of subsistence farming) consumed almost \$25 million of agricultural produce. Only 235 big farms (with \$10,000 or more in sales) sold \$7.5 million worth of produce. Local agriculture is mainly for family consumption, where 75% of all produce is for family consumption while only 25% is sold locally, with hardly any indication of agricultural exports to foreign markets. Fruits and Nuts accounted for 46% of the total value of agriculture, followed by Field Crops with another 41%. Fish caught in the ocean, valued at \$2.6 million, was mainly sold to the public. Chicken and Chicken Eggs were mostly for family consumption, with less than 10% going to commercial sales. The Manu'a District has 30.3% of the total land area, but only 1.8% of the land is in agriculture; the Eastern District has 32% of the total land area, and 30.4% is in agriculture, while the Western District has 36.8% of the total land area with 51.8% in agriculture.

New Agricultural produce sold at the marketplace reappeared starting in 2021. Fishing activities continued to decline as the number of local fishermen and estimated catch significantly dropped in FY2022. Trolling is the main fishing method, followed by longlining.

Section Fourteen

COMMERCE AND TRADE

This section covers data on trade, government purchases, and business registration.

International Merchandise Trade Statistics is classified and presented using the 2012 Harmonized Code System at the two-digit level. The American Samoa Balance of Trade in fiscal year 2022 recorded a deficit of -\$264.9 million. Imports dropped this fiscal year due to both a decline in cannery raw materials and commercial trade products while exports increased by over 20% as tuna products shipped to the US increased. Government purchases including the US market is worth \$15.5 million; highest recorded in the last ten years, while the value of raw fish brought in for processing at the canneries at dropped to only \$177.0 million. The value of merchandise brought in for final consumption and intermediate use amounted to \$641.8 million. Another sector of merchandized imports for sales not captured in the Trade Balance series is the Post Exchange (PX). Export is primarily canned tuna and by-products. In 2022 total export was worth \$376.9 million; an increase of \$66.5 million from the 2021 exports. American Samoa's trading with other countries except the United States is a one-directional flow, resulting in just imports and without exports. The United States received all canned tuna products processed and produced locally. American Samoa's trade partners are the United States, Korea, Fiji, New Zealand, China, Samoa, Australia, and Singapore. The Department of Commerce and Treasury continued to collaborate on the improvement of International Merchandise Trade Statistics to capture imports, exports, and re-exports to include value, quantity, and unit of measure, country of import and origin, destination, as well as the classification of commodities in the HS coding system.

Business License activities issued in FY-2022 increased by 7%.

Section Fifteen

ELECTRICITY AND WATER

This section presents statistics on electricity production, consumption, number of electric meters and water usage. Electricity production continued to increase in the last ten years despite a minimal drop in FY2022. Total gross kWh of electricity generated in 2022 amounted to 176.3 million kWh with about 5.1 million kWh used in the production of electricity, netting 171.1 million kWh for sales. However only 152.7 million kWh were sold and the line loss significantly dropped to 14.9 million kWh. Fuel efficiency remained at 15.8 kWh per gallon while lube oil efficiency increased by almost three folds in 2022. The average weighted fuel cost per gallon increased to \$3.82 compared to \$2.41 in FY2021 resulting in an increase in fuel surcharges by 60% in 2022. Increases in fuel surcharges translate to increased cost of electricity.

The number of meters increased to 12,500 in FY2022 due mainly to an increase in Residential customers. The majority of meters were for Residential Users; about 90.0% and consumed 36.9% of electricity, followed by Commercial Users with 7.4% of meters and consumed 23.1% of total kWh. Large Power Users went from 5 to 22 in FY 2022 while Government meters dropped from almost 500 to about 200 however, the same amount of electricity were consumed by these users.

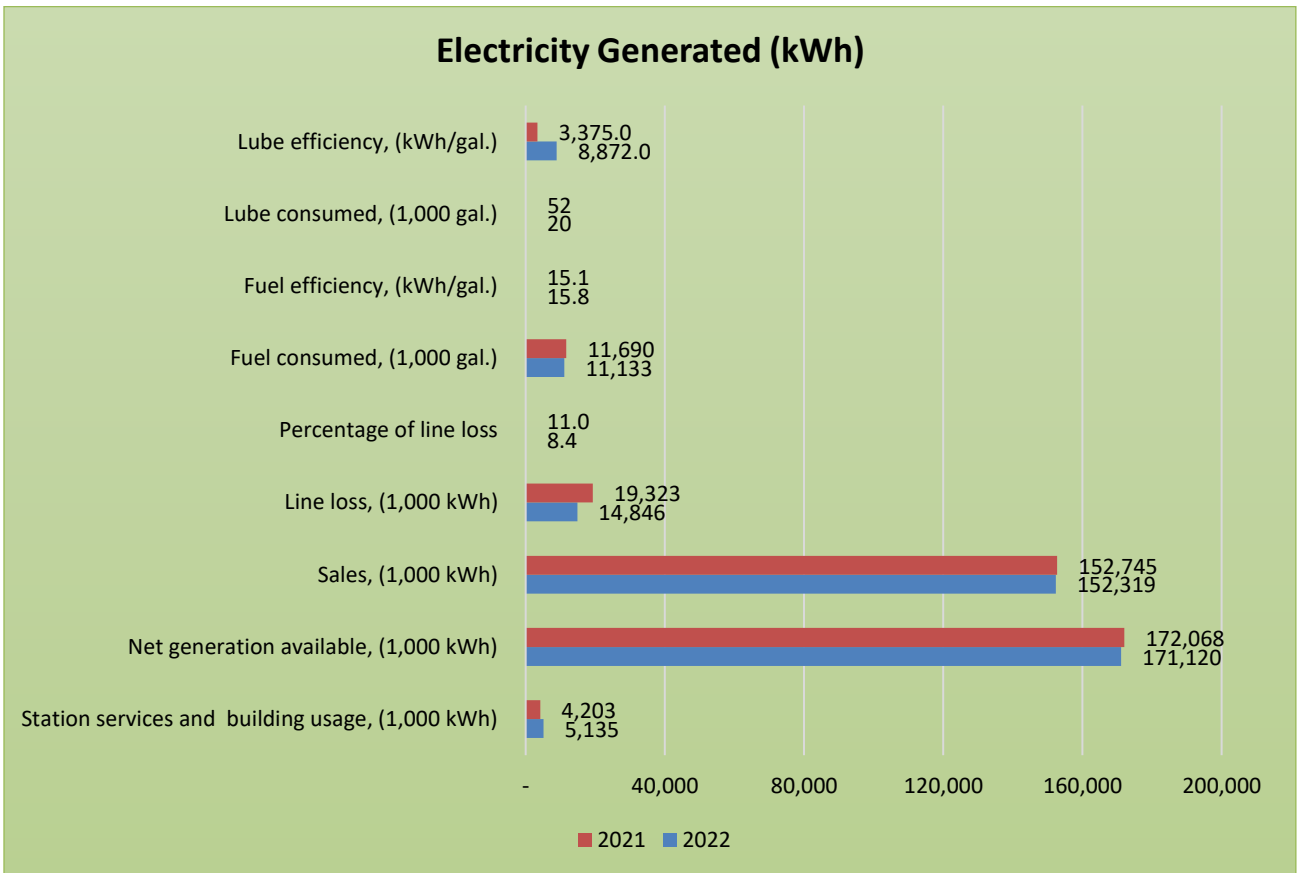

In FY2022, about 149.4 million gallons of water were produced by ASPA and only 58.0 million gallons were sold.

Section Sixteen

NATIONAL ACCOUNTS AND GROSS DOMESTIC PRODUCT

This section presents statistics on the economy of American Samoa as measured by the national accounts system to include Gross Domestic Products for American Samoa as prepared and released by the U.S. Bureau of Economic Analysis (BEA). The BEA under the U.S. Department of Commerce, through the Statistical Improvement Program funded by the Office of Insular Affairs (OIA) of the U.S. Department of the Interior, developed formal methodologies for measuring the GDP of American Samoa and other Island Areas, Guam, CNMI and U.S. Virgin Islands. Since 2010, BEA has released annual estimates of gross domestic product (GDP) for American Samoa from 2002-2022. Statistical data needs and requirements of the GDP projects were furnished by the Island Area governments.

According to a statistical release from BEA, the 2022 GDP for American Samoa at current cost was estimated at \$871 million and with revisions to the 2021 estimate, GDP went up by 16%. Real GDP which is GDP adjusted to remove price changes was estimated at \$645 million compared to a revised Real GDP of \$634 million in 2021. In real terms, there seemed to be a local economic contraction of about 1.7% in 2021. The receipt of direct payments to individuals and families due to the COVID-19 federal assistance and recovery resulted in GDP retention above \$700+ million in the last three years. Personal Consumption Expenditure followed by Government Consumption Expenditure and Gross Investment, made up the bulk of the GDP measure while Net Exports of Goods and Services again remained negative at a current deficit of -\$268 million. Private Fixed Investment accounted for about \$53.

For more information on GDP estimates for American Samoa, please visit the Bureau of Economic Analysis website <http://www.bea.gov> or the DOC website: www.doc.as.gov.
